

OUR MATERIALS

Leather

Leather is one of the most durable, environmentally sound, and value-oriented furniture materials known to man. Because of the strong physical nature of leather, it is the ideal upholstery material. It never goes out of style. And, when treated under modern tanning processes, leather remains supple indefinitely, standing up to the rigors of daily life with minimal care.

Hides have individual wrinkles and scars that make each one unique. No two pieces are alike. These natural markings are the hallmarks of the beauty of leather. There is no other material to match the feel and aroma of good leather.

United Leather only uses 100% top grain leathers. We do not use vinyl matches or low-grade leather splits in our furniture. You will find a broad selection of leathers from stain-resistant finishes that are easy to care for, to pure aniline leathers. We will have one to meet your needs!

Microfiber

With its soft, suedelike hand, Microfiber is one of the most popular materials available today. It has a very luxurious appearance and is a great alternative to natural materials like leather and suede. It is very durable, easy to clean, and comes in a wide-array of colors.

OUR WARRANTY

Your investment in United Leather is protected by a limited lifetime warranty that protects against defects in material and workmanship on the frame and suspension system. You can be assured that each piece of United Leather furniture will provide years of solid service and comfort. For more information, ask your sales representative for a copy of the service agreement.
